

## Rail Workers Hazardous Material Training Program

Peer trainers dedicated to providing quality education and awareness of hazardous materials, empowering rail workers and communities.

# Rail Hazmat Chemical/Emergency Response Training Programs

The Rail Workers Hazardous Materials Training Program is pleased to announce the following HazMat/Chemical Emergency Response Training Programs. This training addresses OSHA and DOT required training in addition to procedures, different levels of response and worker protection in a hazardous materials emergency or release, weapons of mass destruction awareness and the incident command system. The training also provides completion of the OSHA 10-Hour General Industry Outreach requirements. The programs are delivered using interactive classroom instruction, small group activities, hands-on drills and a simulated hazmat response in full safety gear.

The Rail Workers Hazardous Materials Training Program is funded to provide this training by a federal grant from the National Institute of Environmental Health Sciences (NIEHS). This five-day hazmat training course will provide rail workers the essential knowledge, skills, and response actions in the case of an unintentional release. These tools will allow rail workers to protect themselves, their co-workers and their communities.

The funding provides the following student expenses: Air travel, lodging and meals. In addition, an incentive of \$600.00/week is available to all training participants of these programs, except those who are able to secure regular pay through their employer, or are paid union officers. Training will be conducted at the Houston Fire Department's Val Jahnke Training Facility, 8030 Braniff Street Houston, TX 77061.

Programs begin Sunday evenings at 7:00 p.m. and conclude Fridays at 1:00 p.m. Students may be asked to travel on Saturdays to meet program start times or where substantial reductions in airfare warrant.
